 Amazingren | G Google Scholar | LinkedIn

Trento, TN - 38123, Italy

RESEARCH INTERESTS

Representation Learning, 3D Scene Understanding, Multimodal Reasoning, Spatial Intelligence.

EDUCATION

- **University of Pisa (UNIPI) & University of Trento (UNITN)** *11, 2021 - 10, 2025*
  National Ph.D. in AI for Society Italy
  - Supervised by: Prof. Dr. *Nicu Sebe* and Prof. Dr. *Rita Cucchiara*.
  - Thesis Title: Representation Learning Via Transformer: From 2D to 3D

- **Peking University (PKU)** *09, 2017 - 01. 2021*
  MS in Computer Applied Technology China
  - Supervised by: Prof. Dr. *Hong Liu*.
  - Thesis Title: Grouped Spatial-Temporal Enhancement Modeling Based Human Action Recognition
  - Awards: The 2nd prize of the May 4th Youth Science Award (Challenge Cup of PKU) in 06, 2019

- **Central South University (CSU)** *09, 2012 - 07, 2016*
  BA in Microelectronics Manufacturing Engineering China
  - Scholarship: Three times a 3rd-class scholarship winner in 2013, 2014, and 2015.

VISITING RESEARCH EXPERIENCE

- **Visiting Ph.D. Student at INSAIT [ ]** *04,2024 - 09,2025*
  Advised by Prof. Dr. Luc Van Gool Sofia, Bulgaria
  - *All-in-One Image Restoration*: At INSAIT, I led the development of efficient and scalable restoration models for diverse degradations. I proposed AnyIR (*submitted* to TMLR), a lightweight framework leveraging shared semantics for unified restoration with >80% reduction in parameters and FLOPs. Building on this, I developed MIRAGE (*submitted* to ICLR'26), which combines modular feature decomposition and manifold-based contrastive learning to enhance generalization. These works form a solid foundation for practical, high-quality image (and potentially video) enhancement under real-world conditions.
  - *Large Multimodal Models (LMM)*: I explored extending LMMs beyond natural images to structured, domain-specific modalities. We proposed EarthMind (*Submitted* to ICLR'26), a 4B vision-language framework for remote sensing, achieving SOTA performance on the proposed EarthMind-Bench and surpassing GPT-4o, demonstrating strong potential for generalization across multi-granular, multi-sensor visual domains.
  - *3D Representation Learning*: Additionally, I am interested in processing irregular 3D data such as point clouds and Gaussian splats, with a focus on extracting meaningful representations to support downstream tasks. I contributed to ShapeSplat (**Accepted** by 3DV'25 as Oral), which introduces self-supervised learning on object-level 3D Gaussians via masked autoencoding. We then extended this to large-scale scenes with SceneSplat (**Accepted** to ICCV'25 as Oral), addressing structured scene-level representation learning. Then the dataset was extended from 7K to 49K scenes as SceneSplat++ (**Accepted** by NeurIPS'25).

- **Visiting Ph.D. Student at Computer Vision Lab of ETH Zürich [ ]** *08, 2023 - 01, 2024*
  Advised by Prof. Dr. Luc Van Gool Zürich, Switerland
  - *Low-Level Vision*: During my stay at the CVL of ETH Zürich, I proposed SemanIR, a transformer-based image restoration framework that constructs and shares key-semantic dictionaries to enable efficient and accurate restoration with linear attention complexity, achieving state-of-the-art performance across six benchmark tasks. This work has been **Accepted** by NeurIPS'2024.
  - *3D Representation Learning*: Meanwhile, I also worked on a novel framework that integrates contrastive learning into masked autoencoding for 3D point cloud pretraining by using dual random masking and shared-weight reconstruction, achieving decent performance across classification, segmentation, and few-shot tasks. This work has been **Accepted** by ACCV'2024.

Selected Publications

[C.1] **Bin Ren**, Xiaoshui Huang, Mengyuan Liu, Hong Liu, Fabio Poiesi, Nicu Sebe, and Guofeng Mei. **Masked Clustering Prediction for Unsupervised Point Cloud Pre-training**. Accepted by **AAAI'2026** as Oral.

[C.3] Davide Lobba, Fulvio Sanguigni, **Bin Ren***, Marcella Cornia, Rita Cucchiara, and Nicu Sebe. **Inverse Virtual Try-On: Generating Multi-Category Product-Style Images from Clothed Individuals**. *Submitted* to **ICLR** in 2025.

ACADEMIC SERVICES

- Workshop/Challenge Organizer: NTIRE (9th, 10th) at CVPR'(24,25), AIM (6th) at ICCV'25, SPI (1st) at SWC'24.

- Conference Reviewer: NeurIPS, ICML, ICLR, CVPR, ICCV, ECCV, ACCV, BMVC, 3DV, and ICASSP, etc.

- Journal Reviewer: TPAMI, TIP, IJCV, RAL, TMM, and ToMM, etc.

- Area Chair: BMVC'25

SKILLS

- Programming: Python, PyTorch, Linux, Huggingface, Git, ViM.

- Research: Vision Transformer, Low-Level Vision, Gaussian Splatting, 3D Vision, Self-Supervised Learning.

ADDITIONAL INFORMATION

Languages: English (C1, Frequent use), Italian (A2, Basic), Mandarin (Native).
Interests: Cooking, Hiking, and Singing.
